Escapes of Water

*Even the smallest of leaks
can cause significant damage.
If water has escaped from its
storage, heating or distribution
system, our experts can help.*

How Hawkins Can Help

Escapes of water often occur over time, causing flooding, and leading to extensive damage.

Whilst careful maintenance helps to prevent catastrophic failures, early signs of failure can be difficult to detect, as pipework might be covered by installation materials or buried underground, which might limit accessibility during an inspection.

Examples of typical escapes of water cases include:

- Separated joints
- Faulty or broken fittings and parts
- Materials/equipment failures
- Poor system design and installation
- Pressure problems (either high or low)
- 'Water hammer' issues
- Corrosion
- Frost damage and frozen pipes
- Sewage or foul water drainage problems
- Fraudulent or deliberately staged leaks
- Building defects
- Damp proofing issues in basements

We also investigate escapes of oil and other fluids.

- 
- We review regulations, guidance, working practices, and installations to identify areas at high risk of a fault
 - We determine why an incident happened and assist in either repudiation or fraud identification
 - We have laboratories and equipment designed specifically to investigate escapes of fluid
 - We help you to make decisions regarding legal responsibilities
 - We help you to defend wrongful claims

Service Types

Hawkins is a multi-disciplinary forensic practice established in 1980. With offices in the United Kingdom, Dubai, Hong Kong and Singapore, we have over 100 experienced investigators able to provide advice and assistance at any stage of an incident, as well as provide ongoing support and guidance for the future.

PRE-FAILURE RISK MANAGEMENT

Guidance on design, installation, and regulations to ensure safety, compliance, and risk reduction.

ROOT CAUSE ANALYSIS

Scientific investigation into all aspects of an incident to determine what happened, why and in what sequence.

EXPERT WITNESS SERVICES

Independent and impartial technical advice to assist Counsel during all aspects of litigation.

POST-FAILURE ADVICE

Consultancy advice to reduce, mitigate and prevent risks associated with similar events happening in the future.

MAJOR & COMPLEX LOSS

Global resources and multidisciplinary teams, armed with the knowledge, equipment and facilities to manage and investigate major and complex incidents.
