MD5
evidence you can trust

eDiscovery Services

Reduce case costs and timescales

Wading through the huge amount of data in any digital investigation is time consuming and is often a strain on already limited resources.

MD5's solution is already helping many industry sectors with digital investigations to reduce effort and costs.

What are the benefits of using our service?

- Reduces the amount of data the investigator has to wade through by up to 90% so that only relevant digital evidence is investigated.
- User friendly, uses familiar technology.
- Filter, tag, label, code, sort and organise data in to relevant and irrelevant data.
- Accessible from any location, all you need is internet access, on a PC, Laptop or even a mobile device.
- Supports teamworking as multiple users can review the same data simultaneously.

Easy to implement

- User's are not required to use expensive forensic software, just access to the internet!!
- Data can be reviewed 24/7 and from any location (home or office).
- At the outset MD5 offers a clear and transparent understanding of the costs.
- The MD5 team is available for help and support throughout the process.

eForensics Process

Identify
- Internet
- Computer
- Phones
